

# New Electric Car Charging Station & Motorcycle / Moped Parking at Conestoga Mall!

Conestoga Mall's commitment to environmental sustainability has been underscored by the recent installation of an electric car charging station and dedicated motorcycle / moped parking.

In order to help cut down on green house emissions, we are encouraging smarter transportation choices. The electric car charging station is one of the first to be installed in Waterloo Region. This, along with the addition of 9 dedicated motorcycle / moped parking are part of other recent "green" transportation initiatives including the 2009 expansion of the local bus transit station located on our property from 8 to 10 bays.

These two new transportation initiatives come on the heels of the recent addition of the centre's Hydration Station and a number of other ways we are trying to embed environmental sustainability into our day-to-day operations.
